Education

School：Fudan University

Education：Undergraduate

Department：Computer Science and Technology

Major：Computer Science and Technology

Skill

- Work with Python, C++, Swift, JavaScript and other languages.

- Familiar with common data structures and algorithms.

- Learned the basic concepts of machine learning and deep learning. Able to build deep learning model based on Tensorflow.

- Some other technologies like git, web development etc.

Awards won

National Olympiad in Informatics in Provinces (NOIP)
First prize - November 2013
NOI Top Competition (aka CTSC) Silver medal — April 2014
National Olympiad in Informatics (NOI) Third prize — July 2014

Work experience

Shanghai Bilibili Science and Technology Co., Ltd
- The department of artificial intelligence
- Engaged in natural language processing related work
- July to September 2017
Studying in Fudan University , Shanghai key laboratory of informatics
- 2018

Advantages

- Good learning ability, studying in Fudan's honor program. Also learned Graphics, web & application development after school.

- Strong basic algorithms and data structure capabilities.

- Be familiar with some CV, NLP problems. Doing image and video retrieval researches in laboratory now.

- Good ability in project implementation. Have got great achievements in hackthons.

- Good ability and experiences in team work. Many times as a captain to lead partners to produce course projects and hackthon projects, have made excellent works.
